When you first login, you will be brought to the Dashboard. The Dashboard allows you to see orders and quotes. The orders box along the top shows all of your orders and also the quotes that we have input. The quotes box allows you to see the quotes that have been entered from remote users setup in your company. (We are not able to see these) Once your quote is uploaded to an order, it will change the number into our next available order number.

You can also see the status of your order to the far right.

To begin, you must first input a quote.

1) Click on Create quote Create Quote

Add Quote

| Quote Comment: | <input type="text"/> | | |
| Quote Notes: | <input type="text"/> | | |

1. Input your purchase order number
2. Input your customer reference (job name)
3. Input quote contact (so we can contact the correct user if there are questions)
4. Add

For quoting purposes you do not have to input a po# or job name. However, if you do it now, you will not have to go back and add it in. Once you upload the quote to an order, the information in these fields will remain, saving you a step later.

***** It is important that these fields are filled in before uploading the quote to an order because you are not able to make any changes once the quote has been changed into an order *****

1. Input quantity, width, height and thickness. (using the tab key is the easiest way to navigate through the fields) ***** only insert numbers, no special characters ***** (you may input fractions or decimals)
2. Select shape if applicable
3. Select lite 1 information (glass thickness)
4. Select lite 1 glass type
5. Select lite 2 information (glass thickness)
6. Select lite 2 glass type
7. Select spacer (alum or colored). If you hit the refresh button it will automatically calculate the spacer for you (from the overall you input)
8. If you are finished, hit add. If your unit requires grids, please go to the next slide.

If your unit requires grids:

1. Select the width of the grids
2. Select the color
3. Select the style
4. Select the muntin configuration. The system automatically gives a recommended configuration. To change, type over each number. It is extremely important to have _HX_V filled in. If you do not require grids on one dimension, please input a zero. EX: 0HX1V.

After you have input your required grid configuration, hit the tab key or hit enter. You will then see your modified grid configuration on the right.

****Please always make sure there is an X to separate them.****

5. When you are finished, hit add.

Helpful information:

For the life of the software you will be able to search as far back as your purchase history. As the years pass and you need to look back for past orders, you can search here.

(We began using the software on 3/21/16)

1. Select the calendar for your stating date to search
2. Select the calendar for your ending date to search
3. Click on the orders button. This will pull up your order history. You can click on the order number to view the order details.
